

TAKE CONTROL OF CONTRACTS & LICENSING

KNOW YOUR ENVIRONMENT WITH OUR CONTRACT DETECTION ASSESSMENT

We can help you identify contracts from any vendor by pulling a list of devices connected to your environment. Ensure your assets are properly covered and find opportunities to leverage coverage you've already paid for to reduce costs now or in the future.

Then, work with our contract management team to build a roadmap that controls costs and eliminates downtime.

IDENTIFY & ELIMINATE HASSLES FROM ANY VENDOR: THESE COMMON CONTRACTS AND MORE

HP Remote and Onsite Support

Polycom Premier Support

Lenovo Workstation Support

KACE Systems Management

Adobe Licensing

KEMP Premium Support

SonicWall Support

Symantec Licensing

Trustwave Licensing

SSL/UC/Wildcard Certificates

DISCOVER

We will safely examine your systems according to our security best practices to pull a list of devices connected with your environment, paying special attention to identifying out-of-compliance or soon-to-expire contracts or opportunities to increase your returns on existing investments.

ANALYZE

We'll analyze the results from our scan to build a manageable roadmap and help you determine whether to renew upcoming or expired items or use the money to bring older technologies up-to-date based on your business objectives.

DOCUMENT

After we've built a roadmap, we'll provide you with the full list of contracts we've detected, so you know what's in your environment, when action is required, and how much you should budget for renewals in the next 12 months.
