

PEI'S ADVANCED SECURITY PACKAGE

Security threats are constantly evolving, If your defenses aren't evolving with them, your business is at risk for data loss, account breaches, or other serious consequences.

Our Advanced Security Package addresses the major aspects of your security ecosystem, providing a secure foundation that protects your business from common attack vectors. Then, our engineers will spend time in your environment each month building and refining your security posture to keep you protected from new threats as they evolve through monitoring, reporting, and more.

YOUR CLOUD ENVIRONMENT

Tighten your Office 365 security posture with monthly improvements to your **Secure Score**. Plus, keep your data safe with **backups of your data** in OneDrive, email, SharePoint, Teams and more!

SERVERS AND WORKSTATIONS

Keep devices secure with the latest patches installed regularly on servers and workstations and antivirus and antimalware solutions for user devices.

USER BEHAVIOR AND AWARENESS

Even with the best security policies in place, your users can introduce vulnerabilities to your environment. With **simulated attacks**, you can keep your users aware and accurately evaluate your risk,

EMAIL AND INTERNET

Email attacks are growing rapidly. Advanced email and DNS filtering keep malicious messages out of inboxes and stop traffic to malicious links—even if they are clicked on.

USER ACCOUNTS AND CREDENTIALS

Use multi-factor authentication to stop weak or stolen credentials from compromising accounts and login attempts reporting and monitoring to stay ahead of brute force attacks.
